Experience

Master Control Operator

Nexstar Media Group – Denver, CO – 2025-Present

- Monitor broadcast automation and content delivery systems supporting multiple stations nationwide.
- Verify audio and video quality while maintaining signal integrity and reliable on-air operations.
- Diagnose automation and server failures, escalating complex routing issues to engineering as needed.
- Document incidents and corrective actions, coordinating service restoration while maintaining FCC compliance.

Customer Experience Specialist

Best Buy – Lone Tree, CO – 2019-Present

- Provide technical support for computers, mobile devices, home networks, AV systems, and smart home products.
- Troubleshoot hardware, software, account, connectivity, and peripheral issues, clearly explaining solutions to customers.
- Configure devices, applications, network connections, data transfers, and accessories using internal service and inventory systems.

Studio Engineer

JMP Studios, MSU Denver – Denver, CO – 2021-2024

- Supported networked workstations, AV equipment, software, and production systems for faculty, staff, and students.
- Installed, upgraded, tested, and maintained computers, broadcast equipment, and production software.
- Completed studio upgrade projects from installation through testing and deployment.
- Resolved hardware, software, signal, and connectivity issues while providing documentation and user training.

Education

Bachelor of Arts in Visual Multimedia Production

Metropolitan State University of Denver
